- **Design:** Social Media Banners, Diversity & Inclusion Guidenlines, Illustrations

Tools

- **Designing:** Adobe Illustrator, Adobe InDesign, Adobe Photoshop, Sketch
- **Prototyping:** Figma, Adobe XD

Front End

- HTML
- CSS
- JS
- Bootstrap

Languages

English, Hindi, Bengali

PROJECTS

Personal Portfolio Website: Front End Development

- Established colour palette, theme, and design of the website
- Implemented the design using HTML, CSS and JS

Task Management App (MindFlow): UX-R & Visual Design

- empathized and ideated solutions using standard UX-R procedures (personas, empathy maps, user stories, market surveys)
- designed wireframes and mockups
- established user flow using sitemapping
- developed lo-fi and hi-fi prototype for the app
- conducted usability studies & developed insights to update design

Food Customization App (FoodWiz): UX-Research

- Conducted market surveys
- ideated solutions using personas and empathy map insights
- designed & developed working lo-fi prototypes
- conducted usability studies
- developed insights using affinity diagrams & pattern identification

Art Gallery (The Visage): Branding

- conducted reference studies
- ideated name and its identified its uniqueness
- created and finalised logo
- standardised typefaces and colour palettes
- created brand application
- Currently working on a Design project for the same brand

Typographic Research: Graphic Design

- analyzed design trends over the course of history
- authored and published an article on the history of type
- documented characteristic features of typefaces & published articles
